

DYNAMIC STILLNESS biodynamic cranial touch initiatory course

Biodynamic Cranial Practice and the Evolution of Consciousness

31 marts - 2 april 2017 • fredag-søndag

Biodynamic Cranial Touch (BCT) "Stillness Touch"

uses simple hands-on contact to restore the body's natural state of wisdom and harmony. Open to cranio-sacral practitioners and bodyworkers of all kinds. We also welcome psychotherapists with a somatic interest and meditation, movement and yoga instructors who wish to integrate conscious touch into their practice. Most important is your maturity and sincerity combined with an openness to let go of what you already know, to let yourself be informed by, and touch from stillness.

BCT Stillness Practices focus on practitioner development, trusting the wisdom of the forces that create, maintain, heal, and evolve us, as bodies of consciousness and Love.

Required reading: STILLNESS ~ Biodynamic Cranial Practice and the Evolution of Consciousness by Charles Ridley

In this workshop, you will learn:

- BCT history, and current evolution of the practice
- Inner-body stillness practices and meditations
- Recognize subtleties of inner flow as states of consciousness unfolding
- Heart-centered whole-body felt sense awareness uniting all senses into one that guides your sessions
- How to practice BCT for the evolution of consciousness – for yourself and for your clients and how this differs from treatment models designed for relief of symptoms
- Discover where experiences fit on the classical biodynamic tidal map based on the sensual qualities characterized by direct body-felt language
- The mapless journey of BCT inside Pure Breath of Love (chapter 9 STILLNESS, and beyond)
